

Dear Hiring Manager,

I hope this message finds you well.

My name is Danial Thaqif Bin Mohamed Fikri, a final-year Bachelor of Computer Science (Hons.) student at UiTM Shah Alam, expected to complete my studies on 13 June 2025. I am writing to express my interest in an entry-level position in software development, web development, data analytics, or programming within your organization.

Throughout my academic and internship journey, I have developed a strong foundation in both frontend and backend development, as well as in data analysis and AI solutions. I am proficient in HTML, CSS, JavaScript, Bootstrap, Laravel, PHP, Java, Node.js, and MySQL, and I have experience using Git for version control.

During my internship at Aga Touch Sdn. Bhd., I:

- Developed a chatbot using Python, RestAPI, and Cloudflare for the company website.
- Built a real-time project tracking tool using Streamlit, with Gantt chart and matrix view features.
- Implemented Named Entity Recognition (NER) workflows using NLTK, spaCy, Stanza, and Hugging Face.
- Explored LLM APIs for advanced text processing and created basic AI-generated content.
- Gained practical experience in Laravel for backend development and API integration.

Previously, during my internship at Tycoon IM Sdn. Bhd., I:

- Designed and developed WordPress-based websites and improved SEO strategies.
- Led content creation efforts and supported online marketing campaigns to boost brand presence.

I also participated in the **Khazanah Youth Development Programme (K-Youth)** in 2024, completing 129 hours of intensive technical training with a 100% success rate in all assessments.

For my Final Year Project, I developed a **Customer Emotion Recognition System** using Python, TensorFlow, and Convolutional Neural Networks (CNN), achieving 94% validation accuracy and 92% test accuracy on a Kaggle dataset. The goal was to support personalized customer engagement in retail environments.

I am passionate about learning, problem-solving, and building systems that deliver meaningful results. I work well in teams, communicate effectively, and take pride in writing clean, efficient, and scalable code.

Attached are my resume, transcript, and portfolio for your reference.
